

Kjøre Project

EVOLUTION OF GOODS

WORKBOOK SHOES
FALL WINTER 2025/26

Over seventy years has passed since our founding and our commitment to producing only the highest grade footwear.

This conceptual Norwegian brand made with supreme Italian raw materials, a continental element that touches every aspect of the company. With a narrow focus, constant learning, agile processes and creative thinking, continually improve the solutions and insights share.

At *Kjøre Project* , we strive to create modern products that respect the past. All the styles in the Heritage collection are designed and built just as they were fifty, sixty and even over eighty years ago and are all made using premium leather, totally handcrafted to the specifications which made each style timeless when they were first introduced. In the end, all of these elements combine beautifully to evoke a charming elegance that is distinctly *Kjøre Project* 's own.

Even now when people think that machines and technology can only make products, genuine leather still can only be worked by hand. This is why genuine leather products made by highly skilled craftsmen are enjoyable to look at and provide a great deal of warmth.

People never get tired of possessing these fine items; our team of Italian designers and craftspeople produced each Kjøre Project piece by hand, utilizing the same style of tools that have been used to create leather goods for years.
